

Electric Service Schedule 1

Residential Service

APPLICABILITY: This schedule is applicable to domestic lighting, heating, cooking and other single-phase domestic power use of single family detached dwelling units and non-single family multiple units separately metered by the utility.

RATES: Monthly billings shall equal the sum of the following charges:

Customer Charge:	Per meter, per billing period	\$2.79
Energy Charge:	Peak Season (April thru September, inclusive)	
	First 600 kWh, Per kWh:	\$0.0715
	All Additional kWh, per kWh:	\$0.0802
	Off-Peak Season (October thru March, inclusive)	
	All kWh, Per kWh:	\$0.0715

MINIMUM CHARGE: The minimum charge for service under the schedule shall be the customer charge.

SUPPLY COST ADJUSTMENT: All monthly bills shall be adjusted in accordance with Electric Service Schedule 30.

SPECIAL CONDITIONS:

1. Single phase residential service at 120 volts or 120/240 volts will be served under this schedule.
2. Single phase motors used for residential purposes of not more than 7-1/2 H.P. and energized at 120 volts or 120/140 volts may be served under this schedule.
3. Three-phase residential service will not be offered under this schedule except to those residential customers who have existing three-phase residential service on the effective date of this schedule.
4. Sale for re-sale shall not be allowed under this schedule.
5. All new all-electric residential services (single family detached or non-single family detached) that apply for electric service after 2/1/86 shall be billed under Rate Schedule 1.
6. The maximum main breaker size allowed under schedule 1 will be 320 amperes. No instrument metering will be allowed on Schedule 1. If the main breaker size for any residence as defined above is greater than 320 amperes and instrument metering is required, Schedule 3 will apply.
